

## Independent Quality Assurance Audits & Compliance Reviews

Reconstruct provides comprehensive independent quality assurance audits to help organisations strengthen practice, evidence compliance and prepare confidently for regulatory scrutiny. Our senior social care consultants deliver objective, high-quality reviews designed to improve standards and ensure consistent, safe and effective service delivery.

We offer:

- Pre-registration audits to assess readiness for service registration and identify any gaps in policies, procedures or governance
- Pre-inspection audits to evaluate compliance with regulatory frameworks and prepare teams for inspection
- Quarterly, bi-annual or annual quality assurance audits to monitor ongoing performance, identify risks early and support continuous improvement

Each audit includes a thorough review of systems, documentation, practice and departmental processes to ensure they are being followed effectively and meet all regulatory expectations.

Our consultants provide clear, independent oversight and produce a detailed audit report with practical recommendations for improvement where required.

An optional consultancy package is available to support the implementation of recommended changes.
